Tonsillectomy is a well-established procedure for patients with recurrent tonsillitis. However, general anesthesia is required in these patients to ensure patient safety and to minimize the risk of infectious complications. We describe the case of a 5-year-old boy with acquired immunodeficiency syndrome (AIDS) and Burkitt lymphoma who underwent tonsillectomy for recurrent tonsillitis. Although the tonsils had already been removed due to his Burkitt lymphoma when AIDS was diagnosed, this patient also had severe gingivostomatitis, and tonsillectomy was necessary for treatment of his mouth infection. Our patient was successfully treated without any complications.Q: How to search and remove query strings from a url? I want to strip the query strings of an url like so: So that the result would be: I know how to remove the query string by using $_SERVER['REQUEST_URI']; but I don't know how to replace it with something else. A: $arr = explode('?', $_SERVER['REQUEST_URI']); $tmp = explode('&', $arr[1]); $arr[1] = ''; foreach($tmp as $k=>$v){ $arr[] = $k.'='.$v; } $_SERVER['REQUEST_URI'] = implode('?', $arr
