A: 7 - 10 - 2017, Real Hide IP v3.6.3.6 Portable crack 8953 Real Hide IP v3.6.3.6 Portable Serial Key Keygen. Q: Prevent SQL injection in phps I am using post code to take the user to a page, but I have a problem, if the user enters something like and I use it as a page id, the user can go to page 3 of my site. Is there any way to prevent this from happening? I use the following function to generate the URL: function getPostCodeUrl($locale, $postCode) { $postCode = is_null($postCode)? '' : $postCode; $locale = is_null($locale)? '' : $locale; $url = ""; $url.= $locale. '/?page='; $url.= $postCode; $url.= "&locale=". urlencode($locale); return $url; } A: You could try and ensure a minimum of two underscores (_) between your string. function getPostCodeUrl($locale, $postCode) { $postCode = is_null($postCode)? '' : $postCode; $locale = is_null($locale)? '' : $locale; $url = ""; $url.= $loc 2d92ce491b
