

---

I am not able to remove this program in Windows 10. If you can provide a guide to remove Lectra Kaledo Style V1R1C11 please let me know. Thanks. A: Thanks everyone for helping me out. It looks like Lectra is not available for the Indian Windows OS at all. Hence I won't be able to remove the Lectra software from my PC. Hence I decided to change the anti-virus software to Avast. It has many features which are helpful in this day and age. Q: Multiple ifs with else and do/while loop. Difference between jsp and html When I have this code, I'm not getting the result I'm expecting, the output is only in one row... Why? 0);  
if(contador > 0){ System.out.println("FizzBuzz"); } %> But when I try to do it with the jsp (or html) code, is working fine. 0);  
if(contador > 0){ 2d92ce491b
