CHAPTER 7 **Photoshop Elements** Photoshop Elements is a freeware image editing program that can be downloaded from `www.adobe.com/products/photoshop-elements/`. Elements is primarily for creating simple color or black-and-white images using only the tools available in the program. It also includes a plug-in version of Adobe's Art Filter. Elements allows you to use this program to select, sort, and layer various colors, shapes, and objects from one image and then apply them to another. Photoshop Elements has fewer features than Photoshop, making it a great starting point for learning and practicing the basics of photo manipulation. CHAPTER 8 **Adobe Photoshop** Photoshop is a professional editing software program designed for creating high-end images. It has some of the same features as Elements, such as layers, but is much more powerful. If you want more features than Elements, Photoshop can be used. The main difference between Elements and Photoshop is that Elements is a single file, and Photoshop is a collection of multiple files that you can open separately. However, Photoshop tends to be more difficult and time consuming to learn. When you learn how to use Elements, you are getting a small taste of what Photoshop has to offer. You can use Elements to produce simple images, but Photoshop is definitely geared toward professionals. CHAPTER 9 **Printer Profiles** There are several profiles you need to be familiar with when using Photoshop. The most important is the _printer profile,_ a setting that changes the _color space_ (colors) the printer uses to print a particular image. The ICC (International Color Consortium) standard for color is more widely accepted than CMYK (Cyan, Magenta, Yellow, and Black), and it's the one used in Photoshop. If you open an image in Photoshop and set the Printer Profile to CMYK, only the colors in CMYK format will be saved. If you open an image in Photoshop and set the Printer Profile to sRGB, all colors will be saved as RGB. If you open an image in Photoshop and don't set the profile, RGB will be used regardless of whether you have the sRGB setting. You may also see a setting for other colorspace formats like RGB or grayscale. Those are the color spaces Photoshop uses to display

The latest ransomware has been found to be Neuron. Neuron is a variant of WannaCry, although more akin to NotPetya than WannaCry in terms of threat. "This piece of software is designed to encrypt your files and hold them hostage until you pay a ransom for their return. The ransom amount is a set amount that is specific to the infected machine and the password used to unlock the file." How to prevent being locked out of data due to a ransomware attack. There are three levels of ransomware. In the most common form the ransomware becomes active and starts encrypting your files on your computer. It takes advantage of how modern operating systems are designed. Most operating systems have to store files on a partition on the hard drive. The software also checks for changes in the operating system and downloads a patch to fix the vulnerability before executing. This doesn't necessarily mean you'll be safe because the issue was fixed in a security update that was sent out well before Neuron was discovered, but it does mean you have a better chance of avoiding it. The second form of the attack was detected by the original developers of WannaCry (which was in turn based on a Lazarus botnet). This attack is called "Ransom-free." This means that the malware doesn't stop from encrypting your files until it has finished running or until it has enough money to decrypt everything that was encrypted.is it ok to skip the pre trans pre-surgery and just rush directly into surgery yeah You're gonna skip that? You're gonna skip that No No I'm gonna get rid of everything do you have a pre and a post And I'm just gonna do everything right after Okay cool Yeah yeah So what's your prescription? I think this is accurate For how much of everything? Yeah So I'm gonna put a little bit more brown over there and you're gonna make me look like the entire Evel Knievel museum Yeah yeah yeah yeah You want to take the eye off me? Yeah So right here Do you have any tattoos on your body? No Right up the middle of the middle of my back What color is that? It's black right? It's black with a yellow right? A what? Yellow streaks
