Growing up, most of the people who are now Ivy Leaguers grew up, thanks to the

opportunities of World War II, in a comfortable middle-class existence. And in nearly every case, their parents tended to work at the same kind of place. Their parents were teachers, or janitors, or managers at a corporation. They got

appliances have become increasingly popular as the desire for more entertainment on the move has increased. For example, compact disc (CD) and video players now exist with built-in digital cameras, with only the lens

---

protruding from the main housing.

Likewise, digital media players, such as MP3 players, now exist, which store many songs as digital data and play them back directly from the device itself without the need for tapes,

---

records, or optical discs. Typical examples of such a player are the Sony Walkman and Microsoft Zune™. Such hand-held appliances include a display to present the player's status and its various features to a user. For example, players may

---

have displays that indicate how many songs remain in memory, the length of time a song will play, or the amount of time remaining on the battery. The displays in such appliances may be backlit. For example, such displays

---

may utilize an LED or other light source that is positioned to illuminate the display from the back or the front. Backlit displays tend to be relatively small, making the display text difficult to read. Flexible displays, such as liquid crystal

example, the display device might be a liquid crystal display, a liquid crystal on silicon (LCOS) display, an organic light emitting diode (OLED) display, or an electrophoretic display. Such a display device may be used to display text in addition
