

Digestive health plays an important role in overall well-being. Problems such as acidity, bloating, abdominal pain, constipation, diarrhea, fatty liver, and persistent indigestion can affect daily life and may sometimes indicate an underlying condition that requires medical attention. Choosing an experienced gastroenterologist can help ensure timely diagnosis, appropriate treatment, and long-term digestive health.

If you are looking for the [best gastroenterologist in Pune](#), Medcover Hospitals provides comprehensive gastroenterology and hepatology services with experienced specialists, modern diagnostic facilities, and patient-focused care. The hospital's Pune gastroenterology team includes medical and surgical specialists who manage a wide range of digestive, liver, pancreatic, and gastrointestinal conditions.

Who Is a Gastroenterologist?

A gastroenterologist is a specialist who diagnoses and treats diseases affecting the digestive system. This includes the food pipe (oesophagus), stomach, small intestine, colon, rectum, liver, gallbladder, bile ducts, and pancreas.

Gastroenterologists manage both common digestive complaints and complex conditions. Depending on the diagnosis, treatment may include medicines, dietary and lifestyle changes, endoscopic procedures, regular monitoring, or referral for surgical treatment when required.

At Medcover Hospitals Pune, gastroenterology services are designed to provide coordinated care for digestive and liver conditions under one roof.

Gastroenterology Care at Medcover Hospitals Pune

Medcover Hospitals - Best Hospital in Pune offers dedicated gastroenterology services as part of its multispecialty healthcare facilities in Pimpri-Chinchwad. The hospital provides medical gastroenterology as well as surgical gastroenterology services.

The medical gastroenterology team includes **Dr Isha Bansal Agarwal, Consultant Gastroenterologist & Hepatologist**, who has more than 10 years of experience and expertise in advanced endoscopy and liver care. Her areas of practice include gastrointestinal disorders, liver diseases, pancreatic and biliary conditions, preventive gastroenterology, and endoscopic procedures.

For patients requiring specialised surgical care, **Dr Harshal Rajekar, Senior Consultant Hepatobiliary and Transplant Surgeon**, has more than 17 years of experience in hepatobiliary, pancreatic, gastrointestinal, and transplant surgery.

Conditions Treated by Gastroenterologists in Pune

A gastroenterologist can evaluate persistent or recurring digestive symptoms and identify their underlying causes. At Medcover Hospitals Pune, specialists manage conditions including:

- Acidity and gastroesophageal reflux disease (GERD)
- Gastritis and peptic ulcers
- Irritable bowel syndrome (IBS)
- Inflammatory bowel disease (IBD)
- Chronic abdominal pain
- Constipation and diarrhea
- Gastrointestinal bleeding
- Fatty liver disease
- Hepatitis and cirrhosis
- Portal hypertension
- Pancreatitis
- Gallbladder and biliary disorders
- Gastrointestinal polyps and other digestive conditions

The hospital also provides specialised care for liver, pancreatic, and hepatobiliary diseases.

Advanced Gastrointestinal Procedures

Accurate diagnosis is an important part of effective gastroenterology treatment. Depending on the patient's symptoms and medical history, a specialist may recommend investigations or procedures.

Medicover Hospitals Pune offers advanced gastrointestinal procedures including **gastroscopy, colonoscopy, endoscopic ultrasound (EUS), capsule endoscopy, liver biopsy, ERCP, sigmoidoscopy, and double-balloon enteroscopy**. These procedures can help doctors identify digestive tract abnormalities and guide appropriate treatment.

Not every patient requires an invasive procedure. A gastroenterologist first evaluates the symptoms and recommends investigations based on individual clinical needs.

When Should You Visit a Gastroenterologist?

Occasional digestive discomfort may not always indicate a serious condition. However, persistent, recurrent, or worsening symptoms should be evaluated by a qualified specialist.

Consider consulting a gastroenterologist if you experience:

- Persistent abdominal pain
- Frequent acidity or heartburn
- Long-lasting bloating or indigestion
- Recurrent constipation or diarrhea
- Difficulty swallowing
- Unexplained weight loss
- Loss of appetite
- Blood in the stool or black stools
- Jaundice
- Abnormal liver test results

- Fatty liver detected during a scan

Early evaluation can help identify the cause of symptoms and allow appropriate treatment to begin sooner.

Why Choose Medcover Hospitals for Gastroenterology Care in Pune?

Patients seeking gastroenterology care often look for experienced specialists, modern diagnostic facilities, coordinated treatment, and a comfortable clinical environment. Medcover Hospitals Pune provides multidisciplinary care across several specialties, including gastroenterology, medical gastroenterology, surgical gastroenterology, and liver transplantation services.

The hospital follows patient-centred and evidence-based approaches to diagnosis and treatment. Its gastroenterology services combine specialist expertise with advanced diagnostic and endoscopic facilities.

Having medical and surgical gastroenterology expertise available within a multispecialty hospital can also help patients receive coordinated care when a digestive condition requires input from more than one specialist.

Take the First Step Towards Better Digestive Health

Digestive problems should not be ignored when they persist or interfere with everyday activities. Consulting an experienced gastroenterologist can help determine whether symptoms are related to a common digestive problem or an underlying condition requiring further investigation.

For patients searching for the [best gastroenterologist in Pune](#), Medcover Hospitals offers access to experienced gastroenterology and hepatology specialists, advanced diagnostic procedures, and comprehensive digestive and liver care.

If you are experiencing ongoing digestive symptoms or need evaluation for a liver, pancreas, gallbladder, or gastrointestinal condition, consider scheduling a consultation with the gastroenterology team at Medcover Hospitals Pune.
